

# Traffic Signs

## MUTCD approved signage, call us for more options...

Made from heavy duty .080 aluminum and high intensity prismatic reflective vinyl to meet all MUTCD codes. Signature Streetscapes stocks all signs in "High Intensity Prismatic" reflective sheeting, but can also provide "DG3 Diamond Grade" - call for pricing & lead-times. Traffic signs can also have the unfinished backs coated to match your sign poles and accessories at an additional cost (see page 15). Contact our customer service department for more information. For even more standard sign options, or to create a custom layout, call us directly and we can provide you with pricing and full color drawings for approval.

**REFLECTIVITY REQUIREMENTS**

In general terms, retroreflectivity describes the efficiency of a material to redirect light back to its source, which gives signs and pavement markings a brighter appearance at night from the driver's perspective. For more information visit the MUTCD website or contact your local authority for sign requirements.

Signature Streetscapes uses "High Intensity Prismatic" & "Diamond Grade" reflective sheeting, which meets all national requirements set by the MUTCD and FHWA. Additional reflective sheeting options are available upon request, call our customer service department for details and pricing.

# Decorative Sign Frames

## “Extruded Frames” for the following sign sizes...

Solid extruded aluminum frames enhance and protect your signs at the same time. Frames are powder-coated to match the sign pole, and include all necessary stainless steel mounting hardware for installation of standard .080 aluminum traffic signs. We can also custom build frames to fit almost any sign, call us for more information and pricing. CUSTOM SIZES AVAILABLE, CALL FOR PRICING.

## “Faux Halo” Sign Frames for the following sign sizes...

Faux Halo frames are an economical choice for creating a 2” wide frame appearance around outside edge of your traffic sign. Made from .080 aluminum and powder-coated black. Holes are pre-punched to match standard sign hole locations.

		24" x 30" (FH-RT04)		

## Vinyl Coated Sign Backs

Traffic sign backs come standard with a “mill finish” that shows through the backside of the open frame. We suggest covering the back of the sign with black vinyl at a small additional charge for aesthetic reasons. Not required for “Faux Halo” sign frames.
