CNC Routed HDPE Signage

Signs are created with HDPE (High Density Polyethylene) sign board material in 1/2" or 3/4" thickness, depending on the application. The durable textured finish resists scratches and marring. HDPE material is UV stabilized to resist deterioration in harsh outdoor environments. In addition, HDPE is impact resistant, and will not chip or dent like other materials. Signs are created by removing the skin of the outside layer to expose the core color within. Choose from our 10 standard color options on the next page. Several choices are also available for incorporating your special graphics, logo, or custom coloring, see below.

It pays to go green...

Our recycled plastic HDPE signs are made from 95% up to 100% recycled plastic materials (milk jugs, bottles, etc.). Our HDPE has also been proven to last over 20 years in harsh outdoor environments. Less maintenance and a longer lifespan, what more can you ask for!

Signs are created with HDPE (High Density Polyethylene) sign board material in 1/2" or 3/4" thickness, depending on the application. The durable textured finish resists scratches and marring. HDPE material is UV stabilized to resist deterioration in harsh outdoor environments. In addition, HDPE is impact resistant, and will not chip or dent like other materials. COLOR OPTIONS »

As the top layer of the material is removed by the router, the inside color shows through to expose the contrasting core color

Add a logo to your sign...

INSET

Logo is printed and inset into the sign, then covered with a protective shield and sealed with crystal clear resin. UV stable design with full color graphics.

ENGRAVED

Logo is precision engraved into the sign board exposing the core color of the material. Some logos can be color filled with our resin process for an additional charge, call for details.

MEDALLION

Logos can be cast of bronze or aluminum and attached to your sign once finished. Several shape and finish options available. Call for pricing.

A-Frame Easel Signs

Easels can be custom designed to suit your specific needs. Many options are available for customization including: changeable message sliders, clocks, custom verbiage, logos and other custom graphics. Call us with your ideas and our designers can help you create a cost effective, mobile and durable HDPE easel sign today!
